COLLEGE OF ENGINEERING  
COMPUTER ENGINEERING DEPARTMENT

### About Us

Welcome to the Polytechnic University of the Philippines' Partner Companies Portal! We are a group of computer engineering students from the College of Engineering, specifically from 4-2, taking up CMPE 40173 - Database System Implementation under the guidance of our esteemed professor, Prof. Florinda H. Oquindo.

Our team is composed of Angelis Jr. O. Arcilla, Baby Angel I. Comia, John Clifford M. Servera, and Ronald Jay B. Uy. Together, we share a common goal of promoting collaboration and partnership between the university and various industries through this platform.

In order to help our fellow students, faculty members, and other university stakeholders, we aim to present a thorough list of partner companies. By bridging the gap between academia and industry, we hope to provide our peers the opportunity to gain real-world experience and exposure to the ideas and principles they have acquired while in school.

We are proud of this endeavor because we think it demonstrates our dedication to excellence and innovation. We hope that through our efforts, we can contribute to the growth and development of our university, our fellow students, and the industries we serve.

Thank you for visiting our website and we hope that you find our portal informative and useful!
